== Attendees ==

  * Shane Coughlan
  * Hiro Fukuchi
  * Justin Cappos
  * Yoshi Kobayashi
  * Jim Hutchinson
  * Nobuo Imada
  * Nathan Kumagai
  * Mark Gisi
  * Santiago Torres Arias
  * Kate Stewart
  * Endo San

== Project Update ==

  * Fujitsu has been announced as the latest Platinum Member.
  * We had a great workshop at the Leadership Summit on March
13th:
  * tl;dr: OpenChain is going to ISO — Mark Gisi is finalizing
the ISO spec (2.0)
  * Our new conformance web app is now live in English and
Japanese:
https://certification.openchainproject.org/
  * OpenChain will co-host an event in Shenzhen on March 22nd.

== Case Study: In-Toto ==

In-Toto — a New York University Project
  * Over to our guest speaker, Justin Cappos
  * What is In-Toto?
  * How can In-Toto support OpenChain Conformance?

  * in-toto is a general technique for software supply chain
enforcement
  * Cryptographic verification, tamper resistant, provenance,
repudiation
  * Used in many large software companies
  * We are particularly interested in adding license compliance
checking
  * Try out in-toto! https://in-toto.io

presentation-03182019

== Onboarding Work Team ==

  * Finalizing the Path to Conformance, a document that will
become a page on the website.
  * This document is nearly ready and will be featured front and
center on the website:
https://docs.google.com/document/d/1ySsqu-

XoivV5FrNQOEVdpgfI7Q_ltrkBrD ncayMoy4o/edit

We will go live with the first version of this page for *FRIDAY* at the 22nd March Asian Legal Network workshop in Shenzhen. If possible please cast your eye over the document before then.

== Specification Work Team ==

  * The latest draft of the next version of OpenChain Specification can be found here: https://wiki.linuxfoundation.org/_media/openchain/openchainspec-2.0.draft.p df
  * A marked up version can be found here: https://wiki.linuxfoundation.org/_media/openchain/OpenChainSpec-2.0.draft. MarkUp.pdf
  * Recent updates can be found in yellow and blue highlights.

Remaining Steps:
  * Continue to discuss recently received feedback and work through remaining outstanding issues listed on the spec's github account: https://github.com/OpenChain-Project/Specification/issues
  * The wider public comments stage has commenced and will concluded on March 22nd
  * The draft freeze period will begin on March 23rd

== Conclusion ==

  * The project is moving well towards both greater ease of supply chain adoption and formal standardization.
  * The next couple of weeks will see some key services and documents released.
  * The most important deadline is that comments on the Specification update close on *22nd March*
